ISSA KAREEM OYAIFO

Technology & Data Analyst | Power BI · SQL · Excel · Business Intelligence

PROFESSIONAL PROFILE

Technology and data analytics professional with hands-on experience supporting business applications, operational systems, data quality, reporting, and decision-making. Skilled in Power BI, SQL, advanced Excel, DAX, data modeling, dashboard development, and business analysis. Built practical projects across banking, finance, healthcare, retail, pharmaceutical, workforce, and e-commerce/business operations. Strong analytical and problem-solving ability with practical experience building a business website and custom administrative dashboard.

CORE TECHNOLOGY & ANALYTICS SKILLS

Business Intelligence	Power BI, DAX, Dashboard Development, KPI Reporting, Data Visualization
Data & Analysis	SQL, Data Cleaning, Data Modeling, Financial Analysis, Credit Risk Analysis, Trend Analysis
Tools	Advanced Excel, ZoomCharts, Jupyter, VS Code
Web & Business Technology	Business Website Development, Admin Dashboard Development, Authentication, Data Management

PROFESSIONAL EXPERIENCE

CSR Operations & Business Data Analyst | Egatee (NIG)

- Supported backend business applications and operational systems used by CSR teams and field representatives, ensuring smooth day-to-day reporting operations.
- Maintained data accuracy and consistency across operational databases and reporting systems, reducing discrepancies in downstream reports.
- Performed Excel-based data analysis and reporting to support management decision-making.

Technical Support & Inventory Data Assistant | Zamda Health

- Provided technical support for pharmacy management software and POS systems, helping reduce operational downtime.
- Assisted with software installation, configuration, and onboarding of pharmacies onto the platform.
- Supported inventory synchronization and maintained accurate inventory and transaction records.
- Helped troubleshoot software and operational issues to minimize disruptions to pharmacy workflows.

SELECTED TECHNOLOGY & ANALYTICS PROJECTS

TreatsByRich Business Website & Admin Dashboard

- Built a responsive business website and custom admin dashboard with authenticated administrator access and management workflows for business data. Dashboard functionality includes management of products, orders, customers, reviews, notifications, and business settings.

Credit Risk Analysis & Mitigation — Banking

- Analyzed borrower portfolios across USA, UK, and Canada using Power BI and ZoomCharts; segmented borrowers by region, surfaced risk concentration, and built drill-down views for default indicators and risk mitigation.

Consumer Financial Complaints Analytics

- Analyzed consumer complaint data to identify complaint trends, product/service patterns, geographic differences, and operational areas requiring attention; translated findings into an interactive analytics dashboard.

Financial Performance & Variance Analysis — SaaS

- Built a Power BI dashboard tracking $17.9M revenue against a $17.0M budget; identified $511.9K in under-spending and highlighted a $299.9K net-income turnaround through variance and profitability analysis.

HR Workforce Planning & Attrition Analytics

- Developed workforce analytics to examine employee distribution, attrition patterns, departmental trends, and workforce planning indicators, turning HR data into management-ready insights.

Stock Market Trend Analysis

- Analyzed market data to examine price movement, trends, performance patterns, and indicators; presented findings through data visualizations and analytical reporting.

Pharmaceutical Sales & Performance Analytics

- Analyzed €8.63M revenue, €2.42M margin, and 445K units sold; developed DAX KPIs including YoY growth and rolling trend analysis.

Membership & Churn Analytics — Retail/Fitness

- Tracked $68.9K revenue and 21.08% YoY growth; analyzed churn behavior and identified $35.1K in lost revenue.

Operational & Revenue Optimization — Healthcare

- Visualized patient flow for 6,915 patients and analyzed $256K associated revenue; used heat maps to identify peak operating periods.

Animal Shelter Operations Analytics

- Analyzed shelter operations and outcomes to identify patterns in intake, adoption, and resource use.

EDUCATION

B.Sc. Biochemistry — Federal University Otuoke, Bayelsa State

National Diploma — Auchi Polytechnic

CERTIFICATIONS & TECHNICAL TRAINING

- Foundations of Data Analytics — Enterprise DNA

- Introduction to Python — DataCamp
- Intermediate Python — DataCamp
- Introduction to SQL — DataCamp
- Intermediate SQL — DataCamp
- Python Beyond Excel — Enterprise DNA
- Advanced Python for Power BI — Enterprise DNA

ADDITIONAL STRENGTHS

Analytical problem-solving · Business process understanding · Technical support · Data quality & integrity · Dashboard storytelling · Business technology · Continuous learning · Cross-functional collaboration
